LO: to begin to consider the local environment

This week, I would like you to go on an animal scavenger hunt on your walks around your neighbourhood, and consider what you see.

For every new area that you pass, can you determine who uses it?

Are there any parts where you don't see any animals?

Where do you see the most animals?

What makes those two areas different?

When the current restrictions are lifted, playgrounds will start to open and we will get to be outside more. If Richmond council were going to build a new playground in your neighbourhood, where would be the best location? Why? You could add this to your map you made on seesaw.
