

Representing Numbers – Number Representation Cards (0-20)

Development Matters and Early Learning Goal Links:

(M-N28) Records, using marks that they can interpret and explain.

(ELG11) Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single digit numbers and count on or back to find the answer. They solve problems, including doubling, halving and sharing.

Advice and Ideas:

This learning activity enables children to develop their understanding of the numerals 0-20: what each number represents and different ways of showing these various amounts. These cards can also be used in the learning environment to complement ordering activities.

Please be advised, unlike our other Learning Activities, this resource does not link to our ten themes.

Representing Numbers – Number Representation Cards (0-20)

Enabling Environment – Suggested Questions:

How can we show this amount?

**Without writing the numeral,
how could we record '3'?**

Can you think of a different way?

What number does this show?

Can you show me ____?

**Is there another way to show the
same number?**

A Unique Child – Number Representation Cards (0-20)

Child's name: Age:	Date: Practitioner:						
40-60 Months (M-N28) Records, using marks that they can interpret and explain. (ELG11) Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single digit numbers and count on or back to find the answer. They solve problems, including doubling, halving and sharing.
