Achieved

Autumn

Number and place value

Read, write, order and compare numbers to at least 1000000 and determine the value of each digit.

Count forwards or backwards in steps of powers of 10 for any given number up to 1000000.

Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers including through zero.

Round any number up to 1000000 to the nearest 10, 100, 1000, 10000 and 100000.

Solve number problems and practical problems that involve all of the above.

Read Roman numerals to 1000 (M) and recognise years written in Roman numerals.

Number - addition and subtraction

Add and subtract numbers mentally with increasingly large numbers.

Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction).

Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.

Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.

Number - multiplication and division

Identify multiples and factors, including finding all factor pairs of a number, and common factors of 2 numbers.

Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.

Establish whether a number up to 100 is prime and recall prime numbers up to 19.

Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers.

Multiply and divide numbers mentally, drawing upon known facts.

Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context.

Multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000.

Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).

Solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes.

Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.

Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.

Measurement

Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres.

Calculate and compare the area of rectangles (including squares), including using standard units, square centimetres (cm^2) and square metres (m^2), and estimate the area of irregular shapes.

Spring

Number: Multiplication and Division

Multiply and divide numbers mentally drawing upon known facts.

Multiply numbers up to 4 digits by a one or two digit number using a formal written method, including long multiplication for 2 digit numbers.

Divide numbers up to 4 digits by a one digit number using the formal written method of short division and interpret remainders appropriately for the context.

Solve problems involving addition and subtraction, multiplication and division and a combination of these, including understanding the use of the equals sign.		
Number: Fractions		
Compare and order fractions whose denominators are multiples of the same number.		
Identify, name and write equivalent fractions of a given fraction, represented visually including tenths and hundredths.		
Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements >1 as a mixed number [for example $\frac{3}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$].		
Add and subtract fractions with the same denominator and denominators that are multiples of the same number.		
Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.		
Read and write decimal numbers as fractions [for example $0.71 = \frac{71}{100}$].		
Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.		
Number: Decimals and Percentages		
Read, write, order and compare numbers with up to three decimal places.		
Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.		
Round decimals with two decimal places to the nearest whole number and to one decimal place.		
Solve problems involving number up to three decimal places.		
Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.		
Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{3}{5}$ and those fractions with a denominator of a multiple of 10 or 25.		
Summer		
Number: Decimals		
Solve problems involving number up to three decimal places.		
Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.		
Use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling.		
Geometry: Properties of Shape		
Identify 3D shapes, including cubes and other cuboids, from 2D representations.		
Use the properties of rectangles to deduce related facts and find missing lengths and angles.		
Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.		
Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.		
Draw given angles, and measure them in degrees.		
Identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line and $\frac{1}{2}$ a turn (total 180°) other multiples of 90° .		
Geometry: Position and Direction		
Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.		
Measurements: Converting Units		
Convert between different units of metric measure [for example, km and m; cm and m; cm and mm; g and kg; l and ml].		
Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints.		
Solve problems involving converting between units of time.		
Measurement: Volume		
Estimate volume [for example using 1cm^3 blocks to build cuboids (including cubes)] and capacity [for example, using water].		
Use all four operations to solve problems involving measure.
